ENVIRONMENTAL MONITORING FOR THE MOBILE AGE

The cloud-based Sentinel allows you to monitor remote facilities and environments and check critical conditions of your sensitive commodities with the same degree of

certainty you've come to expect from Sensaphone.

It takes the burden out of managing your system by giving you access to your readings

from anywhere using a simple, powerful web-based interface and mobile app. If

there's a disruption, you'll be the first to know. Alerts can be sent straight to your mobile

device—keeping you updated and giving you peace-of-mind wherever you are.

Mobile app available for Android and iphone

IN THE CLOUD

The Sentinel system stores all sensor readings in the cloud, which provides unlimited information storage. Multiple devices can be managed from one account using intuitive web-based management tools. Enhanced data logging capabilities allow users to print, graph or export accurate historical records. The Sentinel system also can produce event reports and deliver them daily via e-mail, as well as generate an audit trail of all user data activities, edits or deletions. The device is Ethernet based, but it is available with a cellular option for locations that do not have Internet access.

Powered by America's largest cellular networks
