Sensaphone[®] Introduces 8-Channel Remote Monitor & Alarm Notification System

Sensaphone 1800 protects water & wastewater facilities with upgraded features

ASTON, Pa., Aug. 29, 2006 – Sensaphone[®] today introduced its latest remote monitoring and alarm notification system, designed to protect water and wastewater facilities.

The Sensaphone 1800 protects water and wastewater treatment facilities by monitoring all equipment and environmental conditions within the facility, flow meters, water levels, timers, temperature, power failure, and alarms.

When the Sensaphone 1800 detects a problem, it automatically issues an alarm so action can be taken to avoid damage to a facility. The new system delivers alarm notifications to as many as eight recipients, and offers alarm history reviews, data logging, web-based interface, and remote control capabilities. Alarm notifications can be sent via voice phone or text messages to alphanumeric pagers and cell phones. It also comes with custom voice messaging on any alarm event, and can upload status and history of conditions to a web server.

“Facility managers invest a lot of time and money in designing the most efficient system possible, which can be significantly disrupted simply because of a power failure or some other unpredictable disaster,” said Bob Douglass, Sensaphone vice president of sales & marketing. “The Sensaphone 1800 watches over that investment as well as the components to that system by reliably monitoring the entire facility.”

The Sensaphone 1800 is packaged in a sealed, weatherproof, lockable enclosure, providing added durability when used in harsh applications. Other added features include a rechargeable battery backup and extended temperature sensing.

For information about the Sensaphone 1800, call 1-877-373-2700 or visit www.Sensaphone.com.

About Sensaphone

Sensaphone stands at the forefront of remote monitor and control solution design, setting industry standards for advancements in technology. The Sensaphone family of products provides a comprehensive line of feature-rich, flexible technology for monitoring equipment, safeguarding property, and reporting critical data. Sensaphone serves a broad range of applications/industries, including telecommunications, network servers, computer rooms, oil and gas, water/wastewater, HVAC & refrigeration, science/health labs, agriculture, greenhouses, and vacation homes.
