### **Sensaphone<sup>®</sup> Showcases New Wireless Remote Monitoring System at WEFTEC 2007** *Sensaphone 2800 on display at leading water and wastewater industry event*

**ASTON, Pa., September 27, 2007** – Sensaphone<sup>®</sup> will feature its latest remote monitoring and alarm notification system – the Sensaphone 2800 – at the WEFTEC 2007 exhibition, October 15-17 at the San Diego Convention Center in San Diego. The newest addition to Sensaphone's product line, the 2800 is the first Sensaphone product fully equipped with wireless sensing capabilities. It offers facility operators the ideal solution for remote monitoring challenges, without the need for wiring. The Sensaphone 400/800 and 1400/1800 systems will also be on display.

#### The Sensaphone 2800 with wireless sensors offers:

- Four wireless inputs plus four traditional inputs
- Wireless sensors with plug-and-play technology and a range of 300 feet
- Repeater modules for monitoring distances up to 4,000 feet.

#### The Sensaphone 400 and 800 systems offer:

- Four or eight external inputs
- Customizable voice messaging, programmable relay output, a phone line seizure feature and a diagnostic test function.

#### The Sensaphone 1400 and 1800 systems offer:

- Four or eight external inputs
- The ability to sense and alarm on ultra-low temperatures down to -85 degrees Celsius, alarm history reviews, data logging, Web-based interface and remote control capabilities.

All of these Sensaphone products are free from monthly fees. They are ideal for remotely monitoring conditions, including tank levels, pump operation, flow rates, power problems, equipment failures and intrusion.

For more information call 1-877-373-2700 or visit [www.sensaphone.com](http://www.sensaphone.com).

### **About WEFTEC**

Since its formation in 1928, the Water Environment Federation (WEF) has been holding annual meetings to provide a forum for knowledge and technology exchange within the water and wastewater fields. Today, WEFTEC – WEF’s Annual Technical Exhibition and Conference – offers water quality education and training and is a leading source for water quality developments, research, regulations, solutions and cutting-edge technologies.

### **About Sensaphone**

Sensaphone stands at the forefront of remote monitor and control solution design, setting industry standards for advancements in technology. The Sensaphone family of products provides a comprehensive line of feature-rich, flexible technology for monitoring equipment, safeguarding property and reporting critical data. Sensaphone serves a broad range of applications/industries, including telecommunications, network servers, computer rooms, oil and gas, water/wastewater, HVAC and refrigeration, science/health labs, agriculture, greenhouses and vacation homes.
