

FOR IMMEDIATE RELEASE

Express II™ Monitoring System Detects Threats to Agricultural Facilities

ASTON, Pa., September 29, 2015 – Sensaphone®, a leader in monitoring technology, offers the Express II™ system that remotely monitors agricultural facilities to keep inventory and animals safe and operations running smoothly.

The system is ideal for farm operators and growers that need to monitor livestock pens, barns, storage areas and greenhouses. When the Express II system detects a problem such as temperature changes, humidity fluctuations and power outages, it immediately alerts up to 48 people with custom phone calls. This instant notification of condition changes allows personnel to take fast corrective action, save critical assets and quickly address a potentially costly situation.

Only one Express II unit is required to monitor up to eight conditions including temperature (from -85 °F to 300 °F), humidity, power failure, fire, carbon dioxide and security. Because the Express II is expandable to include up to 40 channels, it is ideal for facilities that require many monitoring points or are looking at future expansion.

The internal rechargeable battery backup provides 12 hours of continuous monitoring and alerts in the event of a power outage. Each unit is sealed in an enclosure to protect it in harsh environments. The LCD window displays continuous status information and provides keypad programming instructions for easy setup. Free technical support is available, and all Sensaphone systems are manufactured in the USA.

About Sensaphone

Sensaphone® offers a comprehensive line of remote monitoring products that safeguard valuable assets by tracking critical environmental data such as temperature, humidity and power failures. Sensaphone products provide alerts and proactive monitoring data to homeowners and facility managers in many areas including telecommunications, oil and gas, water and wastewater, HVACR, agriculture, healthcare, data centers and greenhouses. More than 400,000 Sensaphone systems are in use today around the world, and they continue to be manufactured in the USA. For more information, call 877-373-2700, email sales@sensaphone.com or visit www.sensaphone.com.
